

We are advertising 13 permanent fulltime or seasonal jobs from GS-05 to GS-11. The application period is open through about January 11, 2015. Each position has a contact person identified if you have any questions.

Outreach Notice for Permanent and Permanent Seasonal Fire Positions

Referral List will be requested on January 12, 2015

The Umpqua National Forest is located in Southwest Oregon

There are multiple positions being filled through this outreach. Duty stations will vary with positions. See table below for positions, duty stations, and contact information

Working on the Umpqua National Forest

The Umpqua National Forest covers nearly one million acres along the western slopes of the Cascade Mountains in Southwest Oregon. The Forest encompasses a diverse area of sparkling rivers and lakes, deep canyons, and rugged mountains up to 9,200 feet in elevation. The Umpqua produces a wealth of water resources, forest, wildlife, fish habitat, minerals, and outdoor recreation opportunities. Visitors discover a diverse place of thundering waters, high mountain lakes, heart-stopping rapids, and peaceful ponds. The Forest is characterized by its many waterfalls, acres of native forest, three wildernesses, and the Oregon Cascades Recreation Area. Also within the Umpqua is the Diamond Lake Recreation Composite, one of the largest developed recreational facilities within the Forest Service. About 75% of the Forest is within the Umpqua Basin, which is also the

boundaries of Douglas County. The Forest comprises 25% of Douglas County.

NORTH ZONE

The **Cottage Grove Ranger District** is the northern most unit. A Type 3 engine is staffed out of this office. Personnel are typically busy with prescribed burning and other project work in addition to fire suppression. Government housing doesn't exist near the ranger station, which is located two miles east of the center of Cottage Grove and 20 minutes south of Eugene (plenty of services in both towns). One government house is available on a limited basis 17 miles from the office.

The **North Umpqua Ranger District** is located in Glide, 20 minutes east of Roseburg. Two Type 3 engines are staffed on this district. Here engines respond to lightning fires, along with prescribed burning and routine maintenance. In addition, the Wolf Creek Interagency Hotshot Crew is hosted out of North Umpqua RD. While no government housing exists next to the ranger station, it is available at the Steamboat Compound 20 minutes west of Glide on the North Umpqua River. Glide has a convenience store, post office, restaurant, churches, and schools.

The **Diamond Lake Ranger District** office is located in Toketee, 60 miles east of Roseburg. Two type 3 engines and a 20 person Type 2 IA handcrew are staffed on this district. In USAJobs, *the duty station is listed as Idleyld Park, OR*. Government housing is available on the Toketee Compound, just minutes' walk from the office. No Wi-Fi service and intermittent cell service coverage. The work load here is much the same as the other units with an abundance of fire suppression, prescribed fire and other project work. You can walk to Toketee Reservoir for boating and fishing. This duty station is in the heart of the Forest with plenty of recreation opportunities just minutes away. It is 60 miles to the nearest full-service grocery store or medical services.

SOUTH ZONE

Tiller Ranger District is our southernmost unit. Similar to the other units Tiller has Two Type 3 engines, a Type 6 engine and a 20 person Type 2 IA handcrew on the district. Like the other units, crews are busy with prescribed burning and project work when not directly working on fire suppression activities. Government housing is available at Mill Hill, less than a mile from the district office. There is no cell phone service or Wi-Fi. Tiller has two small convenience stores, post office, and elementary school. It's a 30-minute drive to Canyonville which has a full-service grocery store and limited medical services, and 60 minutes to Roseburg.

The **Supervisor's Office** is located in Roseburg, population 21,000, which offers multiple stores, restaurants, churches, theaters, clubs, and other services. Centralized dispatch is located in the SO, which also houses two other federal agencies. No government housing is available.

These positions require the successful completion of the Work Capacity Test; 3-miles hike with a 45 lb pack in under 45 minutes. Firefighters are expected to work in stressful and adverse operating conditions, including long hours, heavy workloads, emergency situations, and many days away from home. It is not uncommon to be spiked out in a remote portion of a wildland fire for up to 14 days, working 16 hour shifts, eating a military ration food (MRE), without shower or bathroom facilities available. To be successful each firefighter has to be able to function and communicate in a Team Environment. Poison Oak and Bees can be a concern in this environment.

Umpqua National Forest Fire & Fuels

Vacancy Notification

The following fire and fuels positions will become available to recruit and fill around January 11, 2015. Please contact the appropriate person mentioned below.

Duty Station – Roseburg, OR
